

Sales Data Analysis Dashboard

1. Introduction :

This project focuses on **analyzing sales data** using Microsoft Excel. The objective is to identify sales trends, profit performance, and regional performance through data analysis and dashboard creation.

2. Dataset Description :

The dataset contains sales transaction records including **Order ID, Product Name, Category, Sales, Profit, Quantity, Customer Details, and Region.**

3. Tools Used :

- Microsoft Excel
- Pivot Tables
- Pivot Charts
- Dashboard Visualization

4. Analysis Performed :

- Cleaned and organized the dataset.
- Created Pivot Tables to summarize sales and profit.
- Developed charts for visual analysis.
- Built an interactive dashboard for business insights.

5. Key Insights :

- Highest Profit Product : **CHO-SCR-58000**

- Best Performing Region : **Pacific Region**
- Region-wise sales performance was analyzed.
- Product categories were compared based on profit and sales.

6. Conclusion :

The project successfully transformed raw sales data into meaningful insights through Excel dashboards and visualizations. The analysis helps in understanding business performance and supports better decision-making.
